UROLOGIC LAPAROSCOPY IN Créteil

Fondazione
Vincenzo Pansadoro
Per la Ricerca Uro-Oncologica

Introduction

*Dear Friends and Colleagues,
This year the 8th International Advanced Laparoscopic Teaching Course will take place in Creteil, France.*

We will be visiting the prestigious Department directed by Prof. Claude Abbou, one of the leading European surgeons in our specialty.

We are looking forward, once again, to a very fruitful and stimulating course where standard and innovative procedures will be presented live.

Since January 2002, when we started this adventure of traveling in Europe to visit the best schools of Laparoscopy, the situation has changed. Laparoscopy was regarded somehow as a fancy but probably worthless new surgical technique. Today most urologists are convinced that Laparoscopy will be the way surgery will be performed in the near future.

How far away is this future? Why is learning Laparoscopy so difficult? Why is Laparoscopy still performed only in a few centers in every country? We will try to address these and other questions during this meeting.

For the time being, we feel that the exchange of ideas and experience across Europe is leading the way to progress in this stimulating and challenging field.

A special thanks to our host, Prof Claude Abbou and to our Sponsors that once again have supported us in the organization of this 8th International Course.

Looking forward to seeing you in Creteil.
